

Newly Diagnosed Navigator

The money you raise for YSC through Tour de Pink helps women at all stages of their diagnosis, treatment, recovery and beyond. One of the very first ways a young woman may connect with YSC is by receiving a [YSC Newly Diagnosed Navigator](#). This resource was created to educate and empower newly diagnosed young women. It includes an easy-to-understand breast cancer glossary, questions to ask healthcare teams and inspiring messages from young women who've been down this road. Women may receive a copy from a healthcare provider who partners with YSC, from a YSC volunteer State Leader or by ordering a free hard copy or downloading one from YSC's website. Last year YSC distributed 610 copies of this powerful tool to young women in need. YSC never charges a fee for materials and are grateful for the funds raised by TdP riders that allow us to ensure no young woman faces her diagnosis alone.

The Newly Diagnosed Navigator helps a young woman understand her particular diagnoses, discusses different treatment options, includes best practices for health and nutrition during treatment and steps a woman can take to preserve her fertility.

Young women can order their own copy of the Newly Diagnosed Navigator or download an electronic version [here](#).
